

Problem

Given a string, s , and two indices, $start$ and end , print a [substring](#) consisting of all characters in the inclusive range from $start$ to $end - 1$. You'll find the String class' [substring method](#) helpful in completing this challenge.

Input Format

The first line contains a single string denoting s .

The second line contains two space-separated integers denoting the respective values of $start$ and end .

Constraints

- $1 \leq |s| \leq 100$
- $0 \leq start < end \leq n$
- String s consists of English alphabetic letters (i.e., $[a-zA-Z]$) only.

Output Format

Print the substring in the inclusive range from $start$ to $end - 1$.

Sample Input

```
HelloWorld
3 7
```

Sample Output

```
lowo
```

Explanation

In the diagram below, the substring is highlighted in green:

Language

Java 7

```
4 import java.math.*;
5 import java.util.regex.*;
6
7 public class Solution {
8
9     public static void main(String[] args) {
10         Scanner in = new Scanner(System.in);
11         String S = in.next();
12         int start = in.nextInt();
13         int end = in.nextInt();
14
15         in.close();
16         // System.out.println(S.substring(start
17         String result = "";
18         for (int i = start; i < end; i++) {
19             result = result + S.charAt(i);
```
